SUMMARY

I'm a Computer Engineer with a deep passion for technology. My skill set spans a spectrum of programming languages, encompassing JavaScript, TypeScript, Python, C++, Java, and web technologies such as HTML, CSS, Bootstrap, Material Ui and dynamic libraries like React, angular. On the server side, I'm well-versed in Node and Express, NestJs while my mobile development capabilities extend to Flutter. These proficiencies empower me to bring innovation to life through the power of code.

PROFESSIONAL EXPERIENCE

System Development

Ministry of Innovation and Technology (MinT)

10/2023 – present
Addis Ababa, Ethiopia

- proposing digital system to change manual work
- Taking on the role of a web development team lead for specific projects, I've managed tasks, assigned responsibilities, and maintained project timelines, resulting in successful project deliveries.
- Design and develop the system

Web Developer

Vawick Consulting

04/2023 – 09/2023
Berlin, Germany

- As a full-stack developer, I have successfully executed end-to-end projects, from concept to deployment. I've leveraged a range of development frameworks and libraries.
- Ensuring compatibility across various devices and screen sizes, I've implemented responsive design principles to enhance user experience on mobile and desktop platforms.

EDUCATION

Computer Engineering

Addis Ababa University

09/2019 – 06/2024

High School Diploma

Kidame Gebeya

09/2015 – 06/2019

American English Language

TEFL

10/2018 – 06/2019

SKILLS

- Designing Electrical Circuits and Logic gates,

- Web Development

HTML, CSS, JavaScript, Bootstrap, MaterialUI, React, Angular, Node, Express, NestJs

- Application Development

Flutter

- MySQL database management

- Leadership and Time Management

- Data Science and Machine Learning

Data Science using Python

COURSES

- Major Electrical Courses

AAiT

- C++, Java, Python

AAiT

- Artificial Intelligence, Cloud Computing, Internet of Things and 5G

Huawei Company

- JavaScript, Web Development Courses

Data Science and Machine Learning

Coursera

PROJECTS

- **Huawei Seed For The Future Global Competition Project**

Fake Credential Checking System

- **English to Amharic and Amharic to English Dictionary**

Object Oriented Programming(Java) Project

- **Web Development Projects**

web projects using Bootstrap, Material UI, Styled Component, React, Node and Express, NestJs, MongoDB, MYSQL

Some of the Projects :-

- E-commerce Website
- Inventory Management System
- Apartment Management System
- Company Portfolio Website
- Project Management System

- **Electrical class projects**

DC power supply, 12-Hours clock logic design project, and Filter design for signal processing

CERTIFICATES

- **React-Redux, Node-Express**

Hong Kong University at
Coursera

- **Front End Libraries**

Free Code Camp

- **AI, Cloud of Computing, IOT
and 5G**

Huawei

- **HTML, CSS and JavaScript for
Web Developers**

Johns Hopkins University at
Coursera

- **React-hooks and Context**

mindluster

- **python-core**

sololearn

**IBM Data Science Professional
Certificate**

I have been taking five sequential
IBM Data Science Professional
Courses and I have got three of
certificates at this time

LANGUAGES

Amharic

native

English(as foreign language)

advanced

VOLUNTERISM

Great Ethiopian Run

Assistant

I play a crucial role in ensuring the smooth and effective operation of the program. My responsibilities extend to providing invaluable support to both the course participants and the organizing team

The Grand Abruhot Library

Volunteer Librarian

As a volunteer librarian, I take joy in organizing books, assisting visitors, maintaining a welcoming space, and supporting library events. My dedication comes from a deep passion for fostering a love of reading, learning, and building a vibrant library community
